## ESSENTIAL LIFE SKILLS

### THE VALUE OF MONEY

Being financially literate. Making informed and responsible decisions.

### SOCIAL SKILLS

Learning to network, handle difficult people. Gain connections.

### HEALTH IS WEALTH

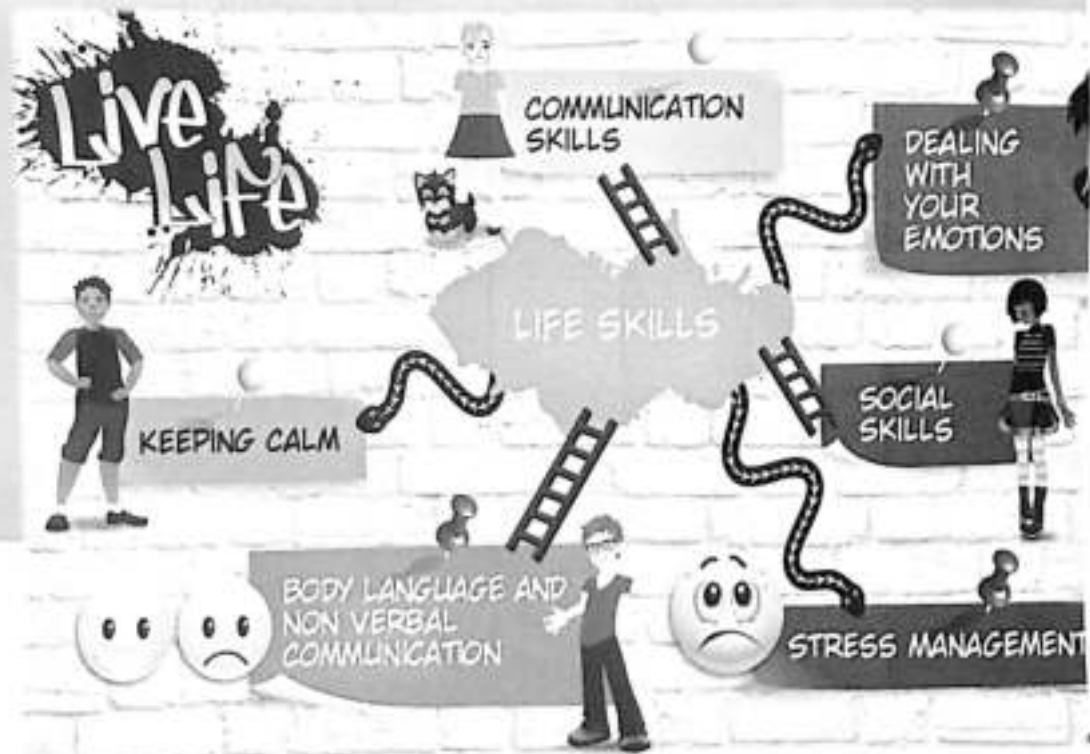

Taking care of your health - Oral, Physical, Nutritional, Mental health.

### RATIONAL THINKING

Think critically. Think logically. Making wise choices and decisions.

### FAILURE

Be alright with failing. Make failure your fuel to succeed.

These skills are defined as a set of psychosocial competence and personal skills that help people make carefully big decisions, communicate effectively with others, developing skills with surrounding circumstances, and manage oneself that leads to progress and success.

Necessary life skills vary by a person's age and culture and society.

## WHAT ARE LIFE SKILLS?

importance of having life skills in a person's life lies in his ability to adapt to all circumstances and proceed in the renaissance and prosperity of society.

one of the most important problems that demand quick attention and solutions these days is the lack of skills for the new generation.

this is because there is a lack of life skills in the output of educational institutions. As a result, many fail to pursue their careers and personal lives due to the absence of these skills they must have.

life skills education helps students build confidence in both communication and cooperative and collaborative skills, provide them with tools important for development, find new ways of thinking and problem-solving and provide methods on how to socialize, make new friends and recognize the impact of their actions and behaviors.

life skills also help students take action in situations where their parents or teachers may not be available to make themselves take responsibility for what they do instead of blaming others.

---

# IMPORTANCE OF LIFE SKILLS EDUCATION

# Self-Awareness Skills

Self-awareness skill is the ability of the individual to be aware of the emotions that afflict him, to identify one's own performance and behavior correctly and respond to various social situations appropriately. Self-awareness skill also helps a person to know what he feels, as well as to understand the behavior and feelings of others and use his knowledge to make successful and sound decisions.

## Empathy and Sympathy Skills

**EMPATHY** skill is the person's ability to accurately put himself in someone else's place - to understand the other's feelings, perceptions, and circumstances from their point of view - and to be able to react appropriately to the situation and to communicate that understanding back to the other person.

**SYMPATHY** skill is the person's ability to show a sense of compassion, commiseration or appreciation for another person and to deal with others' emotional reactions.

ESSENTIAL LIFE SKILLS EVERYONE SHOULD LEARN

# Problem-Solving Skills

Problem-solving skills refer to the individual's ability to identify and define a problem, generate alternative solutions, evaluate and select the best option, implement the selected option and solve problems effectively without any hindrance.

## Decision-Making Skills

Decision-making skills can be defined as the ability of the individual to identify and pass a specific judgment. In a situation he was exposed to and choose alternatives based on the values, beliefs, and preferences after weighing the various alternatives to him.

Decision-making process provides a final choice, which may or may not indicate action. Decision-making skills help to develop problem-solving skills in the following ways:

**Trolling inner sensations, feelings, behavior, and action, as the individual has the ability to reach the right decision.**

**Reaching the right decision is a success for oneself and is the product of continuous thinking that the individual has the ability to make decisions.**

**Being influenced by external pressures when making a decision, no matter how great the pressures are and how strong the external impact is. The inner feeling must be full of positivity and that opportunities still exist to achieve the goals set.**

**A person must be clear in decision-making, and he must know what he wants, otherwise, he will not achieve what he seeks.**

# Thinking Skills

Thinking skills are defined as the mental activities of an individual that he uses to process information, from experiences, build relationships, solve problems, make decisions, ask questions, and create new or organize information. It is worth noting that thinking is not as a description of one thing, but rather a process of existing information about a particular thing to arrive at something else, and this is called **thinking**.

## Communication skills

If the most important life skills, anyone can develop is the skill of communication in a clear and concise way in front of others.

Communication skills are the abilities a person uses when providing and receiving different types of information.

Communication skills reflect many benefits for the person, as he is more comfortable while making ideas that are more confident in himself, in addition to attracting people to him.

People who are good at talking to others can be creative in many businesses, specifically those related to different products, in addition to being able to present ideas and ideologies and influence others through them.

Communication skills require continuous training like all other life skills.

## **Interpersonal Relationship Skills**

Interpersonal skills, or what some refer to as interaction skills, social skills or social competence; are the life skills that a person uses daily to interact and communicate with others, individually and in groups. This skill is characterized by the ability to be learned by all people, regardless of their educational levels or their personality differences.

Interpersonal skills include traits like self-confidence, active listening, critical thinking, communication skills, leadership, and delegation.

## **Accepting Criticism: A Life Skill**

The skill of accepting criticism is the ability of a person to accept constructive criticisms for improvement. Accepting criticism is an important skill in a person's life. It can be difficult for some people to accept criticism from others, but it is important to leave out emotional and sensitive feelings. If one accepts criticism and focuses on the reason for the criticism, one can use it to improve himself and change his strategies to become better.

## **Time Management Skills**

management is one of the most important skills for a person, specifically for those who have a lot of tasks and things to accomplish. Care must be taken on the most important skill, which is a commitment to doing one task at a time, as multitasking leads to a person being distracted and thus wasting time.

---

### **Stress Management Skills**

Stress management skills are defined as the ability that puts one in charge and gives him a sense of control, so it is the ability to control emotions, feelings, and anger toward others. Psychological pressures are defined as a set of external factors that affect an individual, either in part, or affect the integrity of his personality. Stress and fatigue lead to physical stress in humans, so you must have the ability to relax to get rid of any stress or fatigue that may be exposed to. Stress management techniques help boost self-esteem, reduce stress, and anxiety, and improve the overall quality of life. Stress management skills are essential for a person to be healthy and strong.

# Conclusion

skills depend on a large part of our experiences and how we can transfer this experience new generations, in order to learn, preach and provide additional information to their wledge.

now we are facing a rapid change boom and a massive revolution in the field of science at nology, which widens the gap between parents and children, especially with regard to ing and transferring experience to them, and achieving the maximum benefit.

necessary for parents to experience the pressures faced by children and young people. They dld not put additional pressure on them and not be surprised by their behaviors that may coincide with their values, but rather they must understand the technical development at modern time in which they live and coexist.

r should understand the pressures and challenges the children are going through, and se nd common solutions.

**One Day Workshop on**

**Problem Solving and Decision Making Skills**

**Wednesday, 05 January 2021.**

**-Report-**

Department of English, Dr. Babasaheb Ambedkar College, Aundh, and Pune, Organized One day workshop on Problem Solving and Decision Making Skills on Wednesday, 05 January 2021 at 12 to 1.00 pm in TYBA Classroom. Mr. Chandrakant Borude has arranged this session which has been received good response from the students. The workshop embarked by introduction of students. Every student has come forward and introduced themselves confidently.

Problem-solving and decision-making are important skills for business and life. Problem-solving often involves decision-making, and decision making is especially important for management and leadership. There are processes and techniques to improve decision making and the quality of decisions. Decision making is more natural to certain personalities, so these people should focus more on improving the quality of their decisions. People that are less natural decision-makers are often able to make quality assessments, but then need to be more decisive in acting upon the assessments made.

Problem-solving and decision making are closely linked, and each requires creativity in identifying and developing options, for which the brainstorming technique is particularly useful. So this was the main intention behind organising this workshop.

**One Day Workshop on Introducing Yourself Others**

Saturday, 08 Jan. 2021

**-Report-**

Department of English, Dr. Babasaheb Ambedkar College, Aundh, and Pune, Organized One day workshop on Introducing Yourself and Others on 8<sup>th</sup> Jan 2021 at 10:40 am in SYBA Classroom. Mr.Chandrakant Borude has arranged this session which has been received good response from the students. The workshop embarked by introduction of students. Every student has come forward and introduced themselves confidently.

It's human nature to judge, both consciously and unconsciously. As much as we like to believe that we are in complete control of our thoughts, we all make snap assessments of others in a matter of seconds. People are categorized as friend or foe based on the instinctual impulses deep in our reptilian brains. Rational thought only comes into play later; the first impression is a gut reaction. Recognizing the immediacy of these judgments can help you create a good first impression and a lasting reputation.

Whether you are meeting someone in an Interview or online at your local coffee shop, it's important to know how to introduce yourself to set the right tone for your conversation and control your first impression. So This was the main intention behind organising this workshop.

Following Topics have been covered-

- How to introduce yourself confidently
- How powerful introduction changes ones perception
- Self Confidence is the main key
- How you can make impression by Powerful introduction

Introducing yourself to others.

### Short Term Courses 2021-22 Short Term Course in, Photojournalism [level-1]

#### SYLLABUS

##### Course Description :

This is an introductory course in photojournalism presented in a multimedia context. Students will use the journalism College's Canon DSLR (those who have equivalent cameras of their own are encouraged to use them). The course will be taught as a hands-on workshop. Instruction will progress from basic camera operation and the news "one shot" to more comprehensive visual storytelling that may incorporate audio, video or other multimedia components.

Despite technologies that in recent years have transformed how news photography is produced and distributed, the strength of the still image remains undiminished. In fact, the market for stories communicated visually has never been stronger. Photographs, presented alone or as an essay in a multimedia context, continue to provide the photojournalists who make them a uniquely powerful window onto the world in which we live.

This course will help the students become well rounded in the fundamentals of digital Photojournalism. Four areas of instruction will be emphasized: How cameras work in field of Journalism, how composition works, how lighting works, how to use photo editing software. Students will, generally, receive basic instruction, demonstration, and see samples of the desired outcomes, at the beginning of each period. They will be allowed to go outside and shoot assignments, based on what they are learning. Perhaps the most useful part of classroom instruction will be daily reviews of photos students have shot the previous day(s). They will see what makes a successful photo and what does not.

At the end of this course, they will:

Know how to use various features of the camera to have creative control of your photographs for the field of Journalism.

- Be able to decide what type of lighting to use in a given situation to produce optimum results.
- See how photographic composition can make or break a photograph
- Understand how to use photo editing software to improve the overall appearance of images

### “शॉर्ट फिल्म व्हिडीओग्राफी”

श्री. अक्षय होळकर (शॉर्ट फिल्म डायरेक्टर, पुणे)

-अहवाल-

महाविद्यालयातील फोटो जर्नलिझम या शॉर्ट टर्म कोर्सच्या विद्यार्थ्यांसाठी व्हिडिओ ग्राफी या विषयावर शॉर्ट फिल्म डायरेक्टर श्री.अक्षय होळकर यांचे विशेष व्याख्यान आयोजित करण्यात आले होते. श्री. होळकर हे सातत्याने शॉर्ट फिल्म डायरेक्शन मध्ये मोठ्या प्रमाणात काम करत असतात. तसेच त्यांनी "गोरव्या" या सुप्रसिद्ध मराठी चित्रपटाच्या निर्मितीतही द्यतभार लावलेला आहे. सद्यस्थितीत त्यांची "चाळ" ही शॉर्ट फिल्म प्रदर्शनाच्या उंबरठ्यावर आहे. तर अशा या अक्षय होळकर यांनी विद्यार्थ्यांना कुठलाही व्हिडिओ काढत असताना फ्रेम्स कशा प्रकारे निवडाव्यात, ऑब्जेक्ट वरती फोकस कसा करावा? कॅमेरा ॲंगल कुठला निवडावा? कुठल्या गोष्टी व्हिडिओ रेकॉर्ड करत असताना कायम लक्षात ठेवाव्यात? यावर विद्यार्थ्यांना मार्गदर्शन केले. तसेच या कार्यशाळेत विद्यार्थ्यांना एवचुअल व्हिडिओ शूट कसा करावा? याचेही प्रात्यक्षिक दाखविण्यात आले. तसेच व्हिडिओ चित्रीकरण करत असताना कॅमेऱ्याचे महत्त्व काय? यावरही होळकर यांनी प्रकाश टाकला. होळकर यांच्या या व्याख्यानानंतर विद्यार्थ्यांना व्हिडिओग्राफीचे चांगले ज्ञान अवगत झाले.

## Introduction

As the world entered the era of big data, the need for its storage also grew. It was the main challenge and concern for the enterprise industries until 2010. The main challenge and concern for the enterprise industries until 2010. The main focus was on building framework and solutions to store data. Now when Hadoop and other frameworks have successfully solved the problem of Storage, the focus and other frameworks have successfully solved the problem of storage, the focus has shifted to the processing of this data. Data Science is the secret source here. All the ideas which you see in Hollywood Sci-fi movies can actually turn into reality by Data Science. Data Science is the future of Artificial Intelligence. Therefore, it is very important to understand what is Data Science and how can it add value to your business.

Data science is all about finding and exploring data in the real world and using that knowledge to solve business problems. Some examples of data science are:

Customer Prediction – System can be trained based on customer behaviour pattern stop predict the likelihood of a customer buying a product.

Service Planning – Restaurants can predict how many customers will visit on the weekend and plan their food inventory to handle the demand.
