Short Term Courses 2021-22 Short Term Course in, Photojournalism [level-1]

SYLLABUS

Course Description :

This is an introductory course in photojournalism presented in a multimedia context. Students will use the journalism College's Canon DSLR (those who have equivalent cameras of their own are encouraged to use them). The course will be taught as a hands-on workshop. Instruction will progress from basic camera operation and the news "one shot" to more comprehensive visual storytelling that may incorporate audio, video or other multimedia components.

Despite technologies that in recent years have transformed how news photography is produced and distributed, the strength of the still image remains undiminished. In fact, the market for stories communicated visually has never been stronger. Photographs, presented alone or as an essay in a multimedia context, continue to provide the photojournalists who make them a uniquely powerful window onto the world in which we live.

This course will help the students become well rounded in the fundamentals of digital Photojournalism. Four areas of instruction will be emphasized: How cameras work in field of Journalism, how composition works, how lighting works, how to use photo editing software. Students will, generally, receive basic instruction, demonstration, and see samples of the desired outcomes, at the beginning of each period. They will be allowed to go outside and shoot assignments, based on what they are learning. Perhaps the most useful part of classroom instruction will be daily reviews of photos students have shot the previous day(s). They will see what makes a successful photo and what does not.

reserved.

At the end of this course, they will:

Know how to use various features of the camera to have creative control of your photographs for the field of Journalism.

- Be able to decide what type of lighting to use in a given situation to produce optimum results.
